

“The sheer variety of surface treatments available, and the rich palette offered by the new Wood Decors, Naturals and Matt finishes are exciting.”

Architect: Daniel J. Kaplan

THE ESSENCE OF STONE

TRESPA'S SUPERB RANGE OF STONE DESIGNS ADDS AN ENTIRELY NEW DIMENSION TO ITS PORTFOLIO. SUBTLE, NATURAL STONE DESIGNS ENABLE FACADES TO COMBINE MODERN ARCHITECTURE WITH A FEELING OF CLASSIC DURABILITY. THIS EFFECT IS FURTHER ENHANCED BY COMBINING THESE NATURALS WITH TRESPA'S NEW MATT FINISH THAT ACCENTUATES THE AUTHENTIC AND NATURAL SENSE IN FACADE DESIGN. THE COMBINATION OF A MODERN, CONTEMPORARY AESTHETIC WITH NATURAL ELEMENTS CREATES MANY NEW POSSIBILITIES FOR EXCITING ARCHITECTURE.

DECORS WITH A NEW NATURAL TOUCH

Facades That Tell A Story

TRESPA®

“Trespa’s natural wood designs allow us to work innovatively within the existing environment.”

Architect: Daniel J. Kaplan

“Trespa’s new wood finishes will greatly enhance our design choice.”

Architect: Daniel J. Kaplan

THE STORY OF DANIEL J. KAPLAN

WOOD CREATES A SOFTER INTERVENTION WITHIN THE HARDER URBAN ENVIRONMENT

Daniel Kaplan has been using Trespa®’s uniquely natural, flexible properties in the urban environment. His primary focus is sustainable buildings in dense urban contexts. His most recent Trespa® projects have been two residential condominiums, one on the West Side and one on the Upper East Side of Manhattan. Trespa® offers him a way to create truly unique identities for designs in mid to high rise structures.

“Trespa® products are attractive, both for the sheer variety of surface treatments available and for the finishes palette. For mid to high rise construction, there will always be constraints placed on architectural design in terms of constructability, cost and

performance. These three factors form a rigorous filter, oftentimes leaving the architect with a restricted set of aesthetic options. Fortunately, however, Trespa’s vast selection of finishes provides us a flexible way of fashioning truly unique facade identities.”

“New York’s dense urban fabric is often defined by the steel and glass that dot its famous skyline. Applying the natural textures provided by Trespa helps to create a definitive contrast to this urban “roughness” and allows us to work innovatively within the existing environment. Trespa’s new wood finishes will greatly enhance our design choice. The new Mahogany colors will be especially useful to us within the clay-red masonry context

of Manhattan, and I’m very excited to have so many more choices. Simply put: the more choices, the better.

We work hard to create variety within the cityscape that is both sustainable and economic, in addition to being visually compelling. The application of Trespa® panels is a great way to optimize our aesthetic results and leverage the best possible outcomes.”

Architect Daniel J. Kaplan,
Senior partner EXFOWLE, New York, United States of America
