

Campus Pointe

10290 Campus Point Drive
San Diego, California 92121

Showcasing the ethos of one of the world's top biotechnology firms, Campus Pointe's headquarters is adorned with more than 2,100 aluminum fins representing the building block of the company's work: a DNA strand. The two-toned fins — silver with a red strip — were fabricated with consistency to aid in efficiency of build, then installed with slight variations to the angle in order to achieve the patterns found in a DNA string. To create the clean lines desired for this statement entry, seamless 75-foot long oil pipes were brought in by train, then attached to footings cored 45 feet down into bedrock.

KEY FEATURES

- 2,100 Aluminum Fins
- 75-Foot, 16" Seamless Oil Pipe Columns
- CNC Programming

ROLE

Design-Assist

ARCHITECT

Gensler

CONTRACTOR

DPR Construction
