

# Laser Cut Shade + Decorative Panels @ Westfield UTC

4545 La Jolla Village Drive  
San Diego, California 92122

With its \$500 million expansion project, the 1.1-million-square-foot Westfield UTC mall in La Jolla grew by 395,000 square feet of retail space and needed a way to visually connect the expansive space and disparate storefronts with shops ranging from ecco to Shake Shack to Victoria's Secret. Using a unifying floral pattern, California Sheet Metal manufactured shades to stretch over main thoroughfares, columns supporting awnings, panels to line over-street walkways, and climbing walls for clinging ivy. The common design element — incorporated in unique and different ways — brings the entire outdoor space together across its million-plus square feet.

## KEY FEATURES

- Post-painted powder coat finish (two-stage)
- 1/4" thick galvanized steel panels
- Floral pattern laser cut

## ROLE

Design-Assist

## ARCHITECT

HKS Architect, Westfield Design

## CONTRACTOR

Westfield
